2019 Inventory of Living Collection

These data represent all active accessions-items (n=3136) at Polly Hill Arboretum, current as of January 1, 2020.

How to read this table:

Taxon: Botanical name

Item No.: Complete “accession-item number”, an individual identifier, formatted as [accession year]-[accession number]*[item number]

Location: Physical plant location. See: Map of Garden Location & Table

Source: Original source of accessioned plant material

Material: Material type on arrival

P(provenance):

G – Garden (cultivated) origin

W – Direct wild origin

Z – Indirect wild origin

U – Unknown origin
